

I am writing to express my abhorrence to this vote to remove the only protection American consumers have against unfair charges from internet service providers. Eliminating net neutrality will be extremely harmful to the integrity of our open and free internet by allowing ISP's to charge more for accessing certain websites. This is antithetical to our values as Americans and threatens the very core of our freedom of speech.

I beg you, DO NOT end this important regulation at the expense of harming one of our most treasured rights in this country!

Thank you for reading my comments!
